

Reimagining technology

MHL

Enables us to cable smartphones to HDMI-compatible screens/projectors such as HD TVs

The MHL specification is an HD video and digital audio interface for connecting mobile phones and portable devices to HDTVs and other home entertainment products. It utilizes established connectors and features a single cable with a 5-pin interface, supports 1080p HD video and digital audio and simultaneously provides power to the mobile device. It also enables the TV remote to control the mobile phone and access its contents.

What are your 'unreasonable' expectations?!
